Numark MIXSTREAM PRO GO DJ - Controller (Standalone Streaming DJ - Controller, Akkubetrieben, mit Amazon Music)

Fortsetzung von Seite 1:

lightning-fast on-board song analysis lets you practice, perform and enjoy music for hours on end.

BUILT-IN SPEAKERS FOR PARTY TIME…ANY TIME

The high-quality, built-in speakers of the Mixstream Pro Go make it truly standalone and ready for action, right out of the box. These volume adjustable, custom-tuned drivers produce rich, full sound and are the perfect solution for mixing your music on the go. For active DJs, the built-in speakers are the ultimate, convenient option for practicing, livestreaming, video content creation, and personal monitoring when connected to a larger sound system.

TURN YOUR SMART HOME INTO A PARTY PALACE

The Mixstream Pro Go connects wirelessly to Phillips Hue and Nanoleaf smart home lighting, making it easy to add dynamic visuals to your next party or backyard mix session. Using the built-in Engine Lighting embedded control, connecting to a Philips Hue lighting hub or Nanoleaf system only takes a few taps. Once connected, your indoor and outdoor smart lighting will instantly respond and dance perfectly in time to the rhythm of your music. Dynamic on-screen lighting controls let you set the visual vibe for any music genre with options for custom color selection, chase pattern, strobing, and more! The lights even respond to the movements of the crossfader, volume controls, and scratching for an amazing, immersive audio/visual experience!

POWERFUL PRO DJ LIGHTING INTEGRATION AND CONTROL

For advanced lighting options and features, professional DJs can pre-analyze their music library with SoundSwitch desktop software, export their library to a USB drive, SD card, or to their Dropbox cloud, and have full control of DMX lighting using the touchscreen of the Mixstream Pro Go. This functionality makes it simple to provide a professional lighting experience at events and gigs without the need to bring along a laptop or DMX controller.

LAPTOP-FREE PERFORMANCES ON THE GO

The Mixstream Pro Go features 2 USB inputs and 1 SD card slot for optimum versatility when it comes to music selection and library curation. Quickly prep playlists from Serato, rekordbox, and iTunes using the Engine DJ desktop software, export to a USB drive or SD card, insert the drive in the Mixstream Pro Go, and then perform your entire show in standalone mode. This frees up your laptop to be a dedicated broadcasting device for your next livestreaming session!

MULTIPLE DJ PERFORMANCE OPTIONS

In addition to being able to DJ in Standalone Mode with Engine DJ OS, the Mixstream Pro Go’s Computer Mode allows you to use the device as a DJ software controller for Serato DJ (in an upcoming release) and Virtual DJ (Serato DJ Lite is supported for free, a paid license is required for Serato DJ Pro and Virtual DJ). When in Computer Mode, the Mixstream

Pro Go’s touch screen offers hands-on control over library navigation, song selection, FX control, and more. This incredible flexibility combined with the sweet freedom of being battery-powered opens up an entirely new world of location options for your DJ adventures.

ULTIMATE CONTROL FOR MUSICAL CREATIVITY

The intuitive layout and 7" high-definition touchscreen lets you browse, load and play with your music like never before. The 4 built-in effects (Echo, Flanger, Delay, and Phaser) can be customized to compliment any mix and are perfectly timed to the beat when triggered with the fun, interactive toggle switches. Large Filter knobs on each deck and a 3-band EQ on each channel add even more excitement by providing hands-on control over the audio dynamics of your mix.

Scratching with the large, 6" touch-sensitive platters is easy thanks to the Smart Scratch feature, which ensures that the music always stays on beat after adding a scratch solo to your session. The 8 dual-layer Performance Pads feature 4 pad modes (Cue, Saved Loop, Auto Loop, Roll,) providing limitless possibilities for creating dramatic mixes, blends, and transitions. Plus, since the Mixstream Pro Go harnesses the power of the Engine DJ ecosystem, you have direct access to an ever-expanding set of advanced, professional-grade performance features like Sampler, Remote Library, and Touch FX!

FEATURES

- * Rechargeable battery for mixing on the go
